

**Hunters Point Naval Shipyard Superfund Site  
Meeting with OLEM, PEER, & Others on Rad RGs for Buildings  
Internal EPA Briefing Material, August 24, 2021 (3-4 pm ET)**

**Request for a meeting:**

“...we have reason to believe EPA staff may be about to make a deal with the Responsible Party, the Navy, that could weaken cleanup requirements at Hunters Point and, along with other actions, undercut EPA’s cleanup guidance nationally, affecting numerous other contaminated sites.”

“We would like to request that there also be in attendance EPA’s national subject matter experts on EPA’s Preliminary Remediation Goal (PRG) calculators for radionuclides and on radiation survey methods.”

**List of external attendees:**
